

Stade de Reims

Season 2025–2026

Data Visualization Report (FBref)

Khalil Moughamir

Second-year Bachelor's Student in Computer Science (Data Track)
University Institute of Technology of Reims

Executive Summary

Objective

Produce a **clear, visual and staff-ready** analysis of Stade de Reims.

Combine **individual insights** (players) and **collective insights** (team tendencies).

Focus on **interpretable charts** that can be shared with technical staff.

Data sources

FBref tables : **Standard Stats + Scores & Fixtures**.

Visuals built in **Tableau Public**.

Key deliverable

15 charts grouped into **Individual Performance** and **Team / Tactical Analysis**.

Table of Contents

1 Individual Performance (Standard Stats)

2 Collective Snapshot (Standard Stats)

3 Match & Tactical Analysis (Scores & Fixtures)

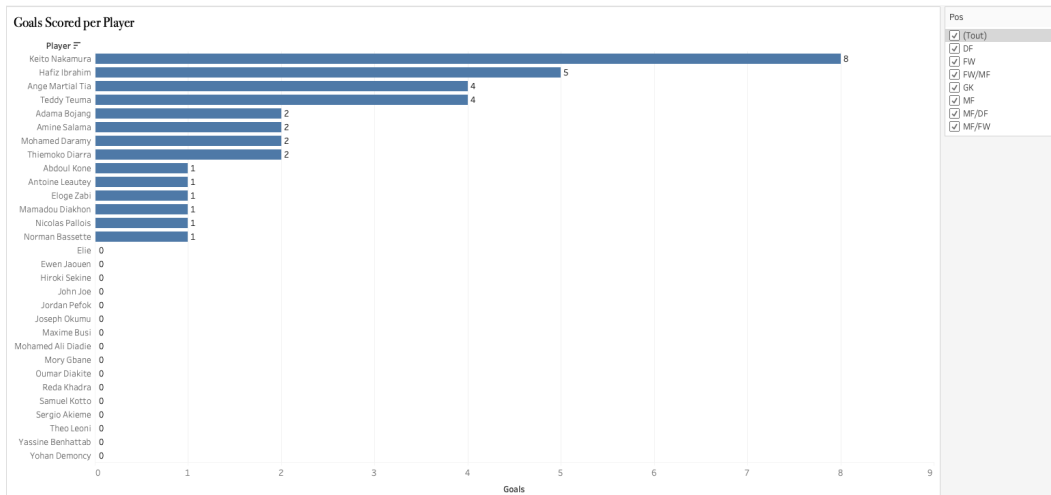

4 Conclusion

Individual Performance Analysis

Player-level statistics

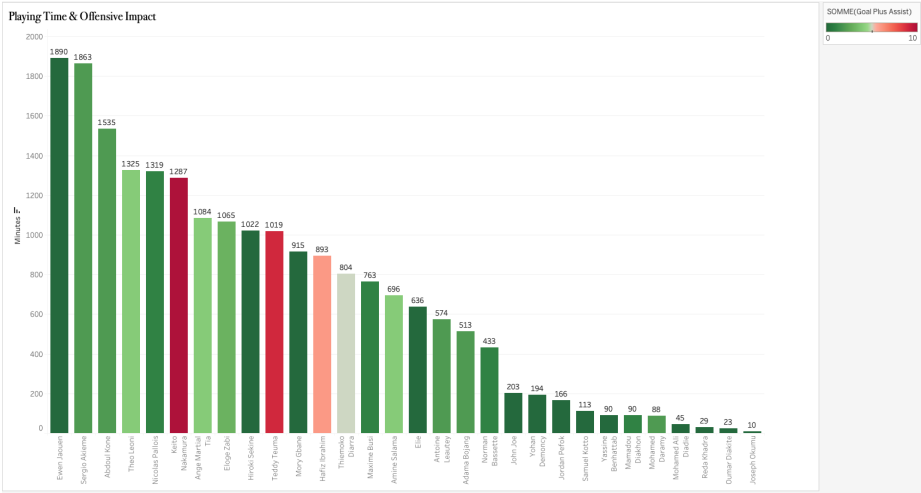

1) Goals scored by player

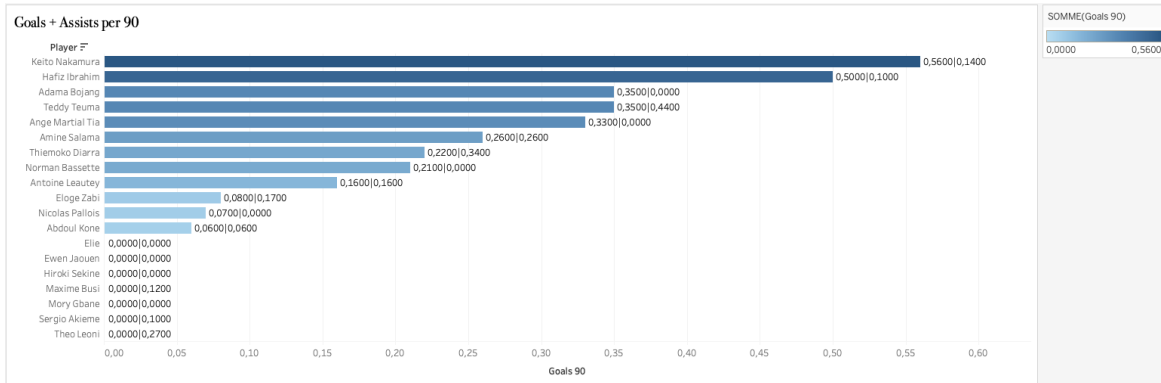

Main scorers and distribution of goals across the squad.

2) Playing time & attacking impact

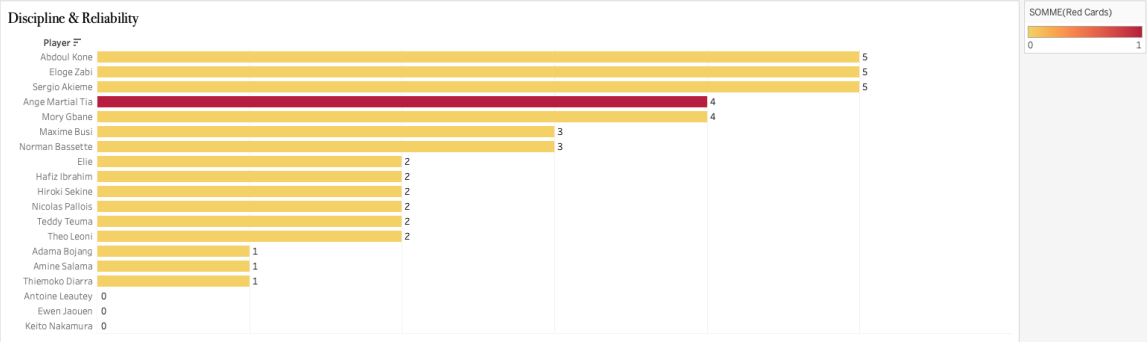

Minutes played with attacking contribution context.

3) Offensive contribution per 90

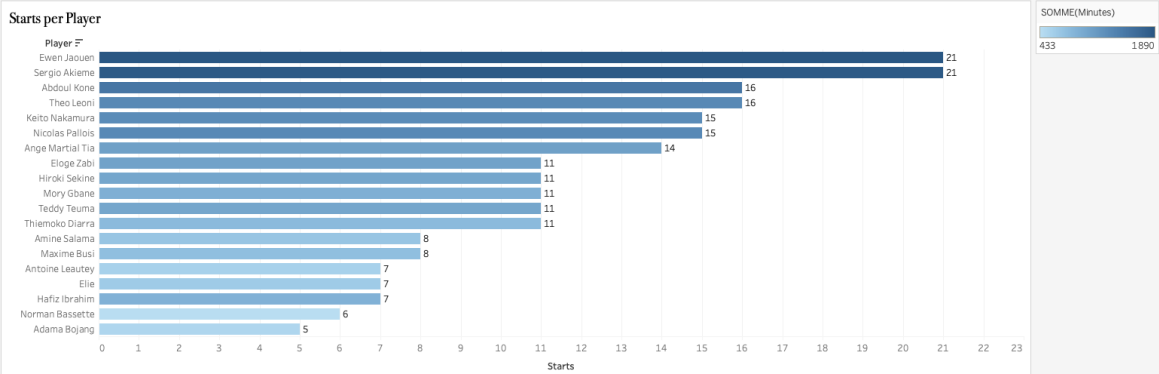

Efficiency comparison : goals/assists contribution normalized per 90.

4) Discipline & reliability

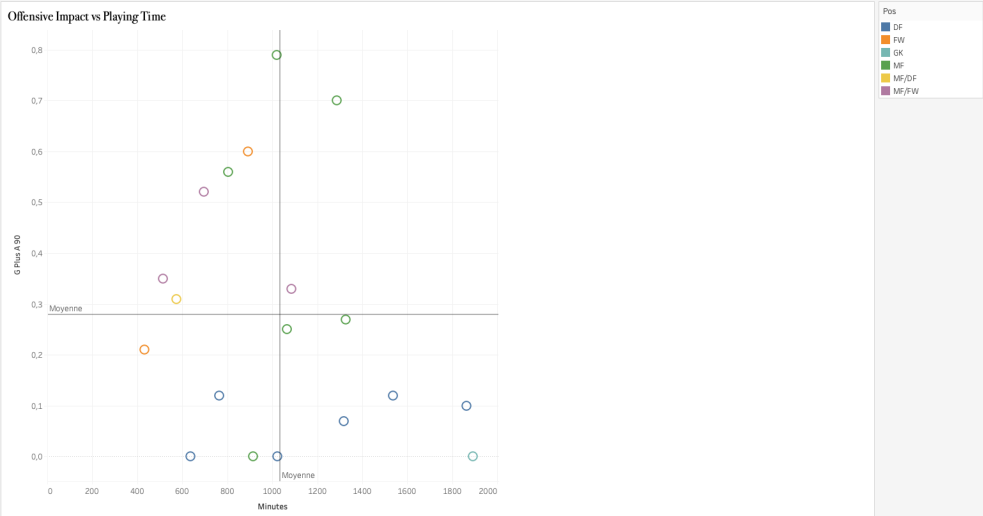

Cards overview : identify risk profiles and discipline patterns.

5) Starts per player

Core starters and selection stability.

6) Attacking impact vs minutes played

Who produces impact relative to playing time (under/over-performers).

Collective Team Snapshot

Team-level indicators

7) Team KPIs

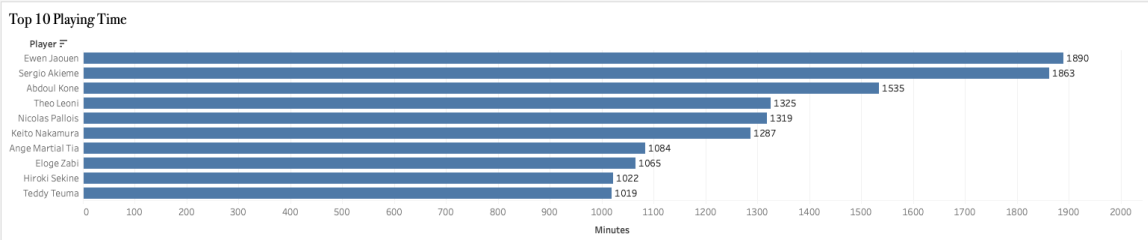

Key Performance Indicators

Total Goals Scored : 35

Goals per Match : 1.67

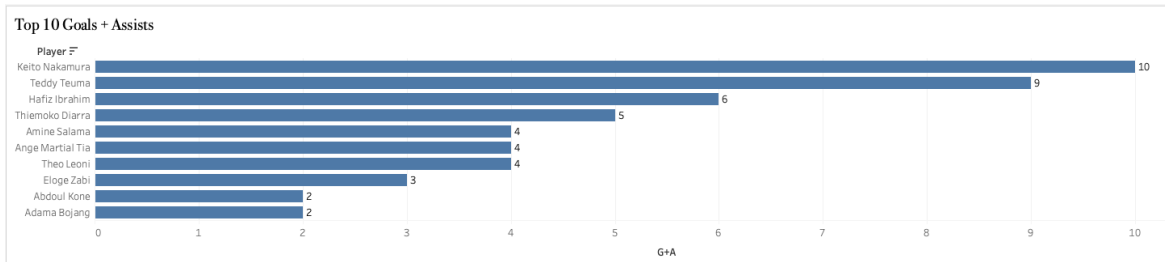

These indicators provide a quick snapshot of the team's overall attacking output and scoring consistency across the season.

8) Top 10 — Minutes played

Workload concentration : identify the team core.

9) Top 10 — Goals + Assists

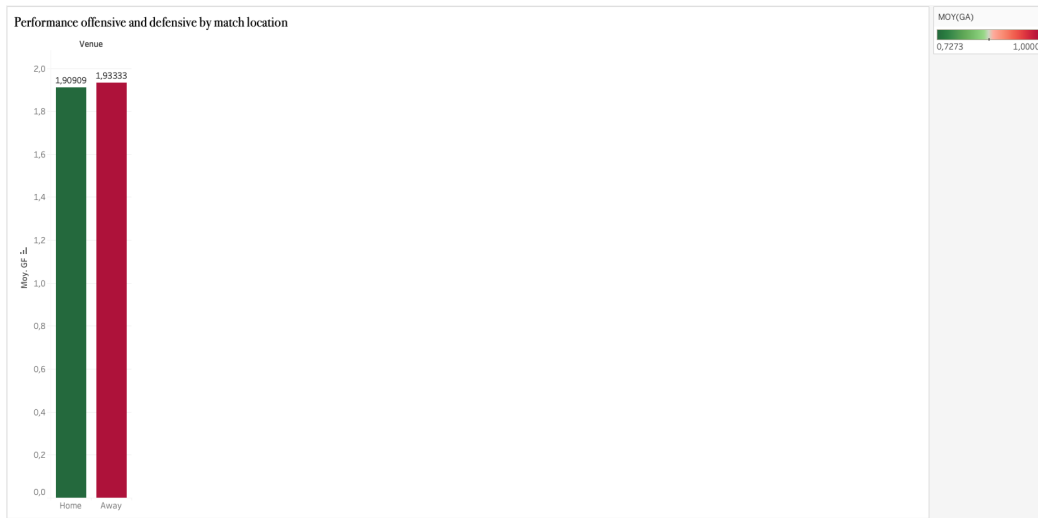

Main direct contributors to attacking output.

Match & Tactical Analysis

Game context and tactical tendencies

10) Performance by match location (Home vs Away)

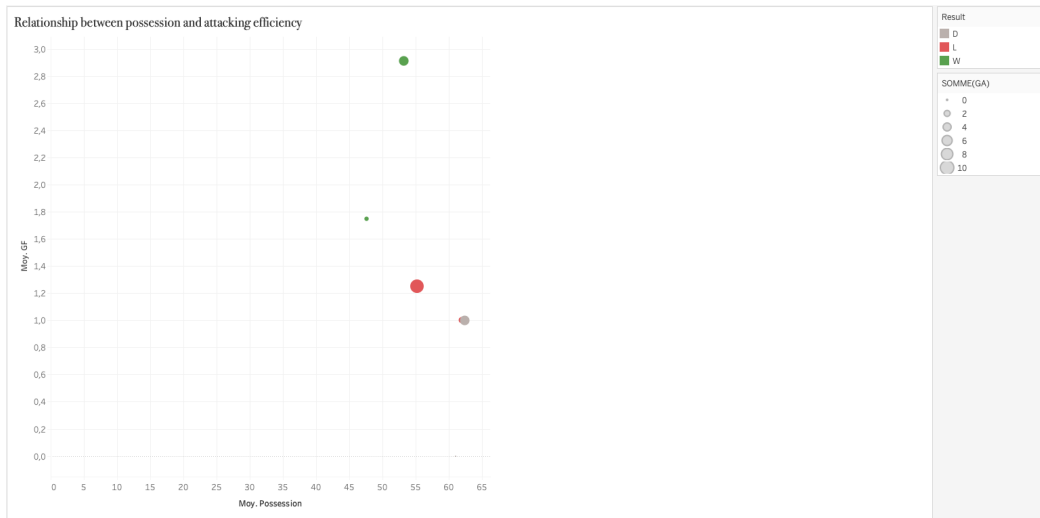

Average goals for and against depending on match location.

11) Evolution of goals scored and conceded

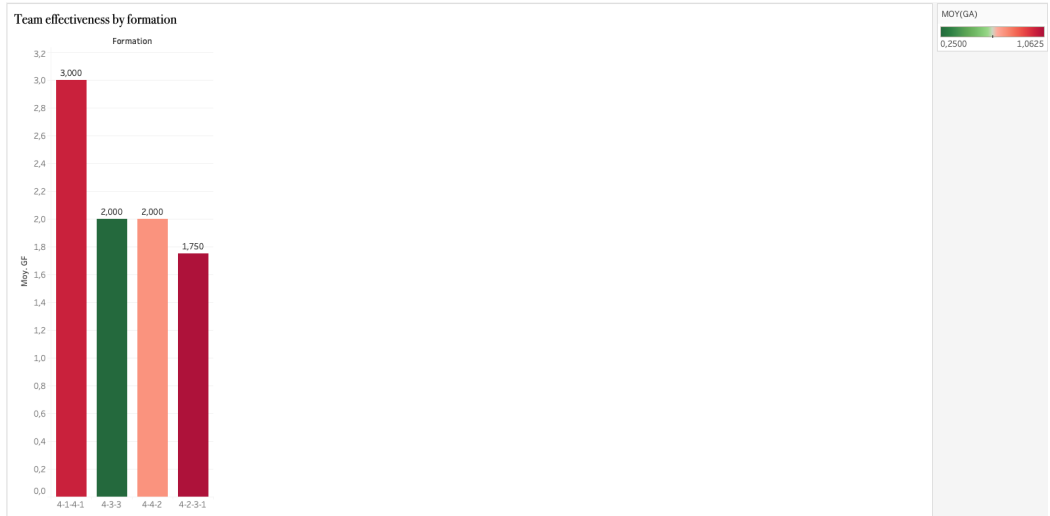

Match-by-match view : attacking/defensive volatility.

12) Possession vs attacking efficiency

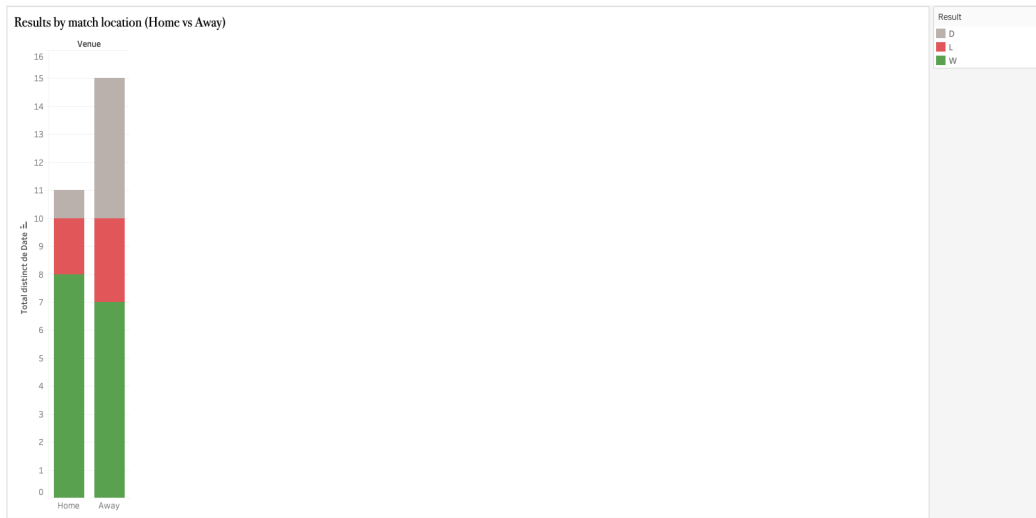

Relationship between possession and goals scored (colored by results).

13) Team effectiveness by formation

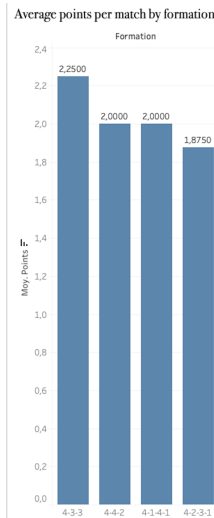

Which formation produces the best balance (GF/GA).

14) Results by match location (W/D/L)

Do we travel well? Distribution of results at home vs away.

15) Average points per match by formation

Points-per-match by formation : result-based tactical efficiency.

Conclusion

Summary

This report provides a **compact, visual and transferable** overview of Stade de Reims performance.

Individual block : identifies key contributors, usage patterns, and efficiency.

Collective block : highlights tactical signals (home/away context, possession link, formation impact).
